

SUPPLIER RFP RESPONSE

NexaWorks

Synthetic proposal for Agentic RFP Evaluation Mini Project

1. Executive Summary

NexaWorks presents a balanced proposal with the strongest implementation planning and support model. Pricing is mid-range and technical design is solid, though some advanced scalability details are brief.

2. Understanding of the Requirement

The supplier understands the requirement as the delivery of a secure, maintainable business application with reliable integrations, a controlled implementation process, transparent commercial assumptions, and ongoing operational support.

3. Proposed Solution and Implementation Approach

NexaWorks proposes a service-oriented platform with API integration, managed relational storage, monitoring, automated deployment, and configurable workflows. The proposal includes a clear integration discovery process and identifies dependencies with existing systems.

4. Timeline, Team and Milestones

12 weeks: discovery 2 weeks; design 2 weeks; configuration 4 weeks; integration 2 weeks; testing 1 week; transition 1 week. Staffing includes a programme manager, technical lead, integration engineer, two application engineers, QA engineer, and support lead.

5. Commercial Proposal

Implementation: \$92,000. Annual support: \$18,000. Estimated cloud/third-party costs: \$15,000 annually. Assumptions and exclusions are clearly stated.

Price assumptions include supplier implementation effort and recurring support. Taxes and unusual third-party consumption charges may be additional where applicable.

6. Security, Compliance and Risk Controls

NexaWorks describes encryption, least-privilege access, MFA, audit logs, backup testing, vulnerability management, data-retention controls, and documented incident escalation. It states that its security programme follows ISO 27001 principles but does not attach certification evidence.

The supplier recommends periodic security reviews, controlled access, documented incident handling, and backup verification.

7. Support Model and Relevant Experience

24x7 critical support, 4-hour target for high-severity incidents, named support lead, monthly service reporting, knowledge transfer, and quarterly reviews. Three relevant customer references are described.

8. Risks, Dependencies and Open Points

The proposal provides less detail on extreme-scale performance testing and some advanced architecture options.

9. Supplier Statement

This document is fictional and created solely for evaluation and demonstration. All prices, projects, references, capabilities, and claims are synthetic.
